PROFESSIONAL SUMMARY

Frontend Developer focused on building responsive, user-friendly web and mobile interfaces with React.js, React Native, JavaScript and TypeScript. Experienced in working with reusable components, REST APIs, responsive layouts and modern UI development. Continuously learning and improving through hands-on projects.

PROJECTS

DailySpend – Mobile App

- Built a React Native / Expo mobile application for tracking personal spending.
- Created reusable components and responsive screens for a smooth mobile experience.

Banking Application

- Developed authentication, account flows and money-transfer interfaces using web technologies.
- Focused on clean UI, form handling and user-friendly interactions.

Dashboard / Management Systems

- Built React-based dashboard interfaces with reusable components and organized layouts.
- Integrated API-driven data and focused on responsive, maintainable frontend code.

TECHNICAL STRENGTHS

- Component-based frontend architecture and reusable UI components.
- Responsive design across desktop and mobile screen sizes.
- REST API integration, form handling, debugging and Git workflows.
- Strong interest in accessibility, performance and clean code.

CAREER OBJECTIVE

To grow as a professional Frontend Developer, contribute to real-world products, and continue developing strong skills in React, React Native, TypeScript and modern frontend engineering while working effectively with a collaborative team.

AVAILABILITY

Open to frontend development opportunities, internships, contracts and remote roles.
